What's New in the PlayWav?

PlayWav was designed with one goal in mind - play ISOBMFF file. If you always wondered what kind of software you can run on top of the powerful sound card present in your computer, there's no need to look any further. PlayWav is a small, handy and no-frills application that allows you to play ISOBMFF file formats (MP2, MP3, OGG, AIFF, ACC, DCM, ASF, AMR, M4A and FLAC) at full speed. In addition, PlayWav supports stereo PCM and IMA ADPCM audio formats, and it's compatible with DirectSound and DirectSound3D. What is unique about PlayWav is that it offers you the ability to slow down or speed up playback - perfect if you're listening to MP3 or OGG. Furthermore, it can automatically fill the gaps between songs, play a beat, or find duplicate files by content. More specifically, PlayWav supports: Play ISOBMFF with maximum quality and highest speed. Add effects during music playback - time reverb, time reverse, echo. Play music from a network drive or you can just stream a single file. Select the position of the playback cursor. Add ID3 tagging. The program has a simple, easy-to-use interface and is incredibly lightweight; it doesn't require any specific skills or experience in order to operate. The interface is well organized and intuitive, and there's always a logical sequence for you to follow. It also includes details regarding the support of other formats, and you can easily switch between them. I have not tested the program on every Windows edition, but a few hours of my experimentation convinced me that the program works flawlessly on Windows 7, Vista, XP and 2000.
